

## ReNew™ Bamboo Table Tops

Bamboo is a rapidly renewable material that is ideal for table tops. It is cut into strips and glued together in multiple plies to create a 7/8" thick top. They can be finished in a variety of standard or custom stains (p.126). Table tops are protected with 1 coat of catalyzed vinyl sealer and 2 coats of catalyzed conversion varnish, semi-gloss. A 3/4" plywood mounting plate is bonded underneath.

These tops can be printed with customer or FurnitureLab™ supplied graphics or logos (p.78-104)

Bamboo is a rapidly renewable resource
